STANDARD FEATURES

Open pan design provides extra capacity and reduces belt friction for lower power requirements. Reduces material buildup on pans for improved belt tracking.

Return wheels carry belt on return bottom to reduce friction for longer belt life and less strain on the drive system.

Precision bearings are sealed and greasable ensuring a long-life and trouble-free, continuous duty.

Convenient adjustment for belt tension and tracking. A 5/8" screw provides up to 20" of belt take-up. The pulley is finned for clean-out.

High-gloss polyester powder coated steel resists rust. The bolt-together conveyor sections are made of heavy-gauge steel for durability.

OPTIONAL FEATURES

PVC Belting Options:

Smooth

Textured

Cleated

Standard or Low-Stretch, cold temperature belts are available with a textured or smooth surface. A cleated belt is available for 1605. The alligator or clipper splice is stainless steel.

Adjustable 0 - 30° incline and decline. Belt stays concave when passing over the elbow for maximum capacity.
Note: 1605 & 1608 models only.

Optional belt wiper or powered brush belt wiper (shown) cleans the top surface of non-cleated belting.

Loading hopper controls material loading and helps prevent spillage.

Covers available to protect material and conveyor from wind, rain and contaminants.
